

REINFORCEMENT CAGES FOR CONCRETE STRUCTURES

Eesti Traat manufactures high-quality **reinforcement cages and column reinforcement cages** for use in **bridges, viaducts, concrete columns and large reinforced concrete structures**.

Factory-produced **rebar cages** ensure dimensional accuracy, faster installation and consistent quality in infrastructure and industrial construction projects.

Advantages

- Reduced on-site labour and installation time
- Controlled factory quality
- Improved construction safety
- Full compliance with engineering specifications
- Manufactured according to client drawings

Technical Data

- Spiral reinforcement option instead of rings
- Length: 1500–12,000 mm
- Diameter: 325–1300 mm
- Spiral pitch: 70–300 mm
- Custom square reinforcement cages available
- Diameter range for longitudinal bars: 8–32 mm
- Diameter range for spiral reinforcement: 6–12 mm
